SOFTWARE FOR SPARE PARTS SHOP TO HELP THEM MANAGE EFFECITIVELY

This software is specially designed for the Spare Parts Shop. Software handles the tasks very efficiently and minimizes the efforts and hassles of keeping the track of each and every record & transaction.

The program is password is protected hence protecting the valuable information from unwanted users. Program allows the users the safe zone for the entire database, i.e. it allows backing-up and restoring of database.

Users need to enter transaction details only at a single place, so that he fills the required information like Stock, payments, incomes, sales, Party and lot more.

Users can input the details of Stock, Vendor Parties, Order and Sales. These details get stored in a database and can me modified or deleted at any moment. Once the details are entered, he just needs to click on the Party Code, Product Code or Order Number while any query result is re quired. Software also has a powerful search feature

which helps in searching for a specific data if the list is very big, lets say 1000 or 2000 entries list.

Users can put details like Product Code, Product Description, MRP, Unit Price, Reorder Level, Quantity and Rack No. for each input record(Stock). As and when you create records, program intelligently sets the link between the selected Code and the selected job. These links can then be used very easily.

Users can even run several types of analysis on the transactions for a given period. Such as who are the receivers of a particular account, who are the depositors of a particular account, who our Good Customers, who are defaulters and so on.
